About RAN

RAN Fire Protection Engineering prides itself on not only meeting but exceeding your expectations. Here is what you can expect from our company.

- A full-service fire protection engineering design and consulting firm.
- Consulting services offered by the firm include detailed engineering design, building risk assessment, commissioning, due diligence investigations, and LEED design.
- RAN Fire Protection Engineering has multiple Qualified Fire Protection Engineers, which are required for Federal contracts, that are hands-on during all projects
- Our projects vary from advanced technological, institutional, and commercial high-rise, to manufacturing, education, and industrial.
- Our personnel have an understanding of projects and user requirements that lead to cost-effective and practical solutions that address your objectives.
- The Principal of the firm is involved in all aspects of building systems engineering; thus, the Principal is directly involved in every project as the "Principal in Charge."
- Our approach to rehabilitation and new building design focuses on the end-user's needs while maintaining a close eye on the construction budget.
